

## **LISTING OF THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Claim 1 (Canceled)**

### **Claim 2 (Currently Amended)**

Tool according to claim 23  $\pm$ , wherein said measuring and display device comprises at least

one measuring sensor for measuring at least one of said plurality of physical values,  
a converter for converting the measured value into an electrical signal,  
a microprocessor for converting the electrical signal into a standardized physical unit, and  
a display of the measured physical value in terms of said unit.

### **Claim 3 (Currently Amended)**

Tool according to claim 2  $\pm$ , further comprising at least one storage device for the storing of the measured value.

### **Claims 4-7 (Canceled)**

### **Claim 8 (Currently Amended)**

Tool according to claim 23  $\pm$ , characterized in that the measuring and display device can be switched on or off.

### **Claim 9 (Currently Amended)**

Tool according to claim 23, further comprising a weighing device arranged for being pulled out or swung out of the pocket knife.

### **Claim 10 (Canceled)**

**Claim 11 (Currently Amended)**

Tool according to claim 23 5, further comprising a pressure-sensitive switch for operating the menu circuit.

**Claim 12 (Canceled)**

**Claim 13 (Currently Amended)**

Tool according to claim 23 †, characterized in that the tool has an interface providing communication with an external device, which permits input of data into the measuring and display device and transmission of data from the measuring and display device.

**Claim 14 (Previously Presented)**

Tool according to claim 13, characterized in that the interface is capable of transmission of data by at least one of cable transmission, wireless data transfer, and optical data transfer.

**Claims 15-22 (Canceled)**

**Claim 23 (Currently Amended)**

~~Tool according to claim 1;~~ Multifunctional tool comprising  
at least one pocket knife in combination with  
at least one measuring and display device for measuring and displaying a plurality of  
physical values, and having a display for displaying said plurality of physical values, and a menu  
circuit for selecting said physical values to be displayed;  
said at least one measuring and display device, said menu circuit, and said display being  
arranged integrally with the pocket knife;

further comprising an access control member in the pocket knife, said access control member comprising an Access-Control-Circuit which emits an access signal.

**Claim 24 (Canceled)**

**Claim 25 (Currently Amended)**

Tool according to claim 23 8, wherein said measuring and display device switches off automatically after a predetermined period of time.

**Claims 26-40 (Canceled)**

**Claim 41 (Currently Amended)**

~~Tool according to claim 1;~~ Multifunctional tool comprising  
at least one pocket knife in combination with  
at least one measuring and display device for measuring and displaying a plurality of  
physical values, and having a display for displaying said plurality of physical values, and a menu  
circuit for selecting said physical values to be displayed;

said at least one measuring and display device, said menu circuit, and said display being  
arranged integrally with the pocket knife;

characterized in that the measuring and display device comprises [[a]] an electronic scale  
for measuring and displaying a weight.

**Claim 42 (New)**

Tool according to claim 41, wherein said measuring and display device comprises at least one measuring sensor for measuring at least one of said plurality of physical values, a converter for converting the measured value into an electrical signal, a microprocessor for converting the electrical signal into a standardized physical unit, and a display of the measured physical value in terms of said unit.

**Claim 43 (New)**

Tool according to claim 42, further comprising at least one storage device for the storing of the measured value.

**Claim 44 (New)**

Tool according to claim 41, characterized in that the measuring and display device can be switched on or off.

**Claim 45 (New)**

Tool according to claim 41, wherein the electronic scale is arranged for being pulled out or swung out of the pocket knife.

**Claim 46 (New)**

Tool according to claim 41, further comprising a pressure-sensitive switch for operating the menu circuit.

**Claim 47 (New)**

Tool according to claim 41, characterized in that the tool has an interface providing communication with an external device, which permits input of data into the measuring and display device and transmission of data from the measuring and display device.

**Claim 48 (New)**

Tool according to claim 47, characterized in that the interface is capable of transmission of data by at least one of cable transmission, wireless data transfer, and optical data transfer.

**Claim 49 (New)**

Tool according to claim 41, wherein said measuring and display device switches off automatically after a predetermined period of time.

**Claim 50 (New)**

Multifunctional tool comprising  
at least one pocket knife in combination with

at least one measuring and display device for measuring and displaying a plurality of physical values, and having a display for displaying said plurality of physical values;

said at least one measuring and display device and said display being arranged integrally with the pocket knife; and further comprising

an access control member in the pocket knife, said access control member comprising an Access-Control-Circuit which emits an access signal.

**Claim 51 (New)**

Multifunctional tool comprising

at least one pocket knife in combination with

at least one measuring and display device for measuring and displaying a plurality of physical values, and having a display for displaying said plurality of physical values;

said at least one measuring and display device and said display being arranged integrally with the pocket knife;

characterized in that the measuring and display device comprises an electronic scale for measuring and displaying a weight.
